## SUMMARY

Accomplished IT Infrastructure Engineer with 12+ years of overall professional experience in Enterprise Networking and R&D, deeply specializing in Production AI/LLM Systems, Local LLM Deployments, and AI Agent development over the past 2 years. Expert at bridging the gap between cutting-edge AI technologies and enterprise network architecture, security, and deployment requirements.

## TECHNICAL SKILLS

**AI & ML (Past 2 Years):** Local LLM Deployment, AI Agent Development, OpenAI/Claude/Gemini APIs, Prompt Engineering, RAG Systems, Voice AI, Code-Generation Assistants

**Development & DevOps:** Python, FastAPI, Docker, Git/GitHub, Linux System Administration

**Databases:** PostgreSQL, Microsoft SQL Server

**Networking & Infrastructure:** Cisco (CCNA), Microsoft (MCSA, MCSE), MikroTik, VMware vSphere (ESXi), PRTG Network Monitor, Sophos UTM Firewall, Kaspersky Enterprise Security, Active Directory

## PROFESSIONAL EXPERIENCE

### Solico Kalleh

**AI Infrastructure Engineer / Consultant** • June 2026 – Present

- **Local AI Infrastructure:** Designed and deployed a fully localized, secure, and air-gapped AI infrastructure tailored for enterprise-wide operations.
- **Advanced Capabilities:** Integrated advanced open-source LLMs to provide secure organizational chat platforms and automated programming/code-generation assistants for development teams.

**BitPin** | Leading Cryptocurrency Exchange

**AI Engineer / Network Engineer** • May 2025 – June 2026

- **Voice AI Secretary:** Designed and developed an intelligent Telegram automation assistant capable of processing user voice inputs, understanding intent/context via LLM, and generating fluent voice responses autonomously.
- **Token Manager:** Architected and deployed a centralized LLM API gateway serving 250+ production users, significantly reducing organizational token costs through smart routing and advanced caching.
- **Open WebUI Platform:** Implemented and optimized an enterprise-scale AI platform hosting 454 distinct language models for 250+ active organizational users.
- **Operations Automation:** Developed and deployed custom AI Agents including an HR Bot for streamlined workflow automation and an IT Help Desk Bot for automated first-line infrastructure support.

**Elite Daru** | Pharmaceutical Corp.

**Network Engineer — Multi-Site Infrastructure** • December 2022 – March 2025

- Centralized and managed the nationwide network infrastructure of multiple enterprise branches across several provinces from the Tehran Headquarters.
- Designed and maintained secure inter-branch VPN connectivity and routing layouts using MikroTik infrastructure.
- Administered corporate ERP database systems (SQL Server) and applied rigorous PRTG-based network performance monitoring.
- Oversaw endpoint security and boundary protection utilizing Sophos UTM Firewalls, Active Directory, and Kaspersky Enterprise.

**FANAP** | Enterprise IT & Banking Solutions

**R&D Engineer** • September 2015 – September 2022

- Contributed to research and rapid prototyping of hardware-software integrations for enterprise banking equipment and ATM systems.
- Engineered a Field Force Tracking Android application, enabling real-time location and route metrics oversight for executive management.
- Developed core components for an automated Cash Acceptor Machine and led specialized R&D initiatives for transaction automation.

### **Gilan Science & Technology Park**

*Software Programmer* • March 2014 – March 2015

- Developed and maintained localized software solutions and contributed to core programming tasks within the technology park's incubator projects.

## **EDUCATION**

---

### **Bachelor's Degree in Computer Software Engineering**

*Jaber Bin Hayyan University (2011 – 2013)*

## **CERTIFICATIONS**

---

- Cisco: CCNA
- Microsoft: MCSA, MCSE
- Cloud: Azure Fundamentals (AZ-900)
- Virtualization: VMware VCP
